EAN Exclusion Action Results

The EAN Exclusion Action Results page displays all EANs at your location that are pending exclusion results. You may have a large number of these EANS so this page has been designed to provide you with a variety of ways to group them for faster processing.

Getting to the EAN Exclusion Action Results page

You can enter the EAN Exclusion Actions Results page from many places in ARM. You may want to go immediately from entering an EAN Acknowledgment in the system or you may begin entering exclusion actions from the Workspace. This guide will show you how to reach the Exclusion Action Results page from both those locations.

Click on "Pending Exclusion Results" in the Status column for a commodity from either the Shipments or Regulatory Action sections to be sent to the "EAN Exclusion Action Results" page. The <u>Regulatory Action</u> section requires fewer clicks to move forward.

From the Workspace – Shipments Section

Single Commodity Shipment

When a shipment has only one commodity, "Pending Exclusion Results" will appear in the Status column, as shown below.

You will be sent to the EAN Exclusion Action Results page.

From the EAN Issuance or Acknowledgment pages

At the top of the EAN pages, you will see "breadcrumbs," which are links that allow you to move across the EAN process to all the articles in the shipment that require EANs. Next to the links you will see circles. A blue circle indicates the page you are working on. The white circles show the other pages in the EAN process; when you are on the Exclusion Results page, you cannot move back to the other pages because the Exclusion Action Results page shows multiple shipments.

EAN Exclusion Action Results							
1 Select	Article Information						

The EAN Exclusion Action Results Page

The Exclusion Action Results page displays all articles active in the EAN process for your location, including EANs for creation and acknowledgment, although you will not see the status displayed on the page.

The page is designed to allow you to enter exclusion results for multiple EANs at the same time rather than needing to go into each one individually. The requirements for batching EANs for processing are that they must share:

- Action Required
- Treatment Schedule, if treatment is required

TIP: Because these are the fields that must match so that EANs can be processed in batches, using the drop-down menus and sorting capabilities for these fields will make the job go much faster.

Navigating the EAN Exclusion Action Results page

Depending on the number of articles needing exclusion results, you may find a long list of items on the page. All columns are sortable so if you have a large number of articles in your table, you can more easily find the item for which you are looking. You can also find an article by using the filter field and selecting the number of records to display on the page.

Selecting number of records for display

As on the Workspace, ARM defaults to displaying five records:

	5 🗸	records per page		
USD	United States Department of A Animal and Plant Health Inspection			▲ •
⊞	 Issuance Acknowled 	gment Exclusion Action Results		
i	EAN Exclu	sion Action Results		
Ē	Select Article records per page	Information	Filter	Show Active

At the bottom of the table, you will find listed how many EANs in your location are pending Exclusion Results:

Article drop-down menu expanded

Expanded Treatment Facility drop-down menu location on the page

Action Required field

Because the "Action Required" field is one in which they must be the same (Treatment Schedule is the other) to process in a batch, it is especially important to understand both ways it can be used to group EANs.

Make your selection from the drop-down menu. The drop-down menu will show only the actions available in the EANs at your location.

Action Required drop-down menu expanded

Or you can sort by Action Required.

Click on the ¹¹ icon. This allows you to group the EANs by Action Required.

The screen shot below shows such a sort – in this case "Destroy":

PIS31610025-E001	Container : 2309482		Destroy		Idlan Biglan
PIS316020025-E001	Begonia sp Begon	100 Plant Units	Destroy		Idlan Biglan

Treatment Schedule field

"Treatment Schedule" is another very useful field because the Treatment Schedules must match in order to process multiple EANs at the same time. As with the Action Required field,

you can sort or use the drop-down menu to group the EANs. The variety of Treatment Schedules displayed in the drop-down menu reflects the Treatment Schedules among the EANs in your location and will vary accordingly.

Entering EAN Exclusion Action Results

In the example below, two EANs from the same shipment have been located by entering a partial shipment ID in the Filter field.

To enter Exclusion Results for multiple EANs at the same time, they must share:

- Action Required
- Recommended Treatment Schedule

In this example, they both require Re-export.

			Action Requ	ired 🌡	t				
			Select	~]				
			Re-export						
			Re-export		Fil	ter	60012		×
	ed States Department of Agric nal and Plant Health Inspection Sen	ulture Ka							▲ •

	PIS318060012-E002	Clematis sp Clem Article		Units Quantity	Action Required	Treatment Sch Recommended	edule 1	Treatment Schedule Taken	Treatment Facility

<u>NOTE</u>: In entering multiple EAN Exclusion Action Results, ARM cycles sequentially each time you click a box. ARM does not wait until you've checked boxes all for the EANs. You must wait for the cycle after each box is clicked. As a result, you will not know until the second box is checked and ARM has compared their properties if you can batch together the Exclusion Action Results.

You always will see section 2, Exclusion Action Results Information, after checking the first box. But if the outcomes do not match, the section 2 error message will appear and section 2 will disappear. The process will be described in the guidance below.

Select an EAN by clicking the check box at the far left.

The EAN record will turn green. ARM will cycle and section 2 Exclusion Action Results Information will appear.

Date Action Taken

If you need to change the Date Action Taken field, which is a required field, you can do that by clicking on the Calendar icon to the right of the field or clicking inside the field to display the calendar.

Click on the accurate date and it will display in the field.
