---

On the Inspection Results page, users will enter the results information after inspecting a conveyance, wood packing material (WPM), and/or a commodity. This will allow users to submit a pest found, a commodity determination, and/or a regulatory action.

- A. From the Document Review page, there are two ways to access the Inspection Results page after a record is created.
- B. Click on the Breadcrumb link Inspection Results, which is located on the top right side of the page.

- C. Click on the Inspection Results Tab  which is located on the bottom right side of the page.

- D. From the Main Workspace, there are different ways to access the Inspection Results Page.

1. Click the link “Inspection In Progress” under the Status column.
2. Click on “View Details” to access the Inspection Results Page.

When there are multiple commodities in a record with multiple statuses, users will see “View Details” under the Status column instead of “Inspection In Progress”. Once you click on the plus icon on the left-hand side, users can click on “Inspection in Progress” to navigate to the Inspection Results page.
